Nationality	Indian
Work Status	EU work permit, legally eligible to work in Germany

Professional Summary

Impact-driven Full-Stack Software Engineer with **10+ years of experience** delivering scalable solutions at global BFSI leaders (Bank of America, Cognizant, TCS). Proven track record: **\$500K+ cost savings, 50M+ users served, 5+ product teams scaled**. Expert in **Angular 2–17, React, TypeScript, C#, GraphQL, REST APIs**, with deep expertise in **WCAG 2.1 accessibility compliance, SOLID design principles**, and **full-stack architecture**. Recognized with awards for upskilling and cross-functional leadership. Seeking senior/lead engineering role in German fintech, banking, or software engineering sector.

Professional Experience

Software Engineer II-A (Senior Front-End Developer)

Bank of America Continuum India, March, 2022 – Present
Chennai, India

- Led architecture for core banking applications serving **millions of customers**; designed reusable Angular component library adopted by **5+ teams**, reducing implementation time by **30%**.
- Spearheaded Virtual Assistant initiative and developer portal enhancements: **\$500K+ cost savings**, improved WCAG 2.1 accessibility compliance, optimized Angular performance for high-traffic dashboards.
- Recognized with **Silver Award** and multiple **Bronze Awards**; mentored junior developers and led architectural code reviews in mature Agile environment.

Developer Associate (Front-End Developer)

Cognizant Technology Solutions, September, 2019 – March, 2022
Chennai, India · Client: World Bank

- Delivered full-stack development for two flagship platforms serving **50+ countries**, managing fund operations across international donor networks.
- Built Strategic Fundraising Plan (SFP) portal and Call of Funds (COF) application in Angular 8: digitized manual workflows, automated donor reminders, reduced administrative overhead.
- Maintained high code quality through unit testing (Jasmine/Karma), peer reviews, and strict adherence to SOLID principles.

IT Analyst (Front-End Developer)

Tata Consultancy Services (TCS), May, 2015 – August, 2019
Trivandrum & Chennai, India · Client: Bank of America

- Built and maintained 4 mission-critical full-stack applications supporting Bank of America's internal banking operations across tax reporting, transaction monitoring, access control, and file processing.

- Developed Tax Reporting System (TRS) in AngularJS managing millions of transactions; automated 750-byte to 1695-byte file conversion, eliminating manual data entry at scale.
- Designed Access Control Management Engine (ACME) reducing approval cycle time and strengthening security governance; demonstrated progression to handling complex full-stack requirements in regulated banking environment.

Education

Bachelor of Engineering (B.E.), Production Engineering

2011 – 2015

Government College of Technology, Coimbatore, India

Skills

Languages	JavaScript (ES6+), TypeScript, C#
Front-End	Angular 2–17, React 16+, Vue.js, AngularJS, HTML5, CSS3, Bootstrap
Back-End	Node.js, C#, RESTful & GraphQL APIs, real-time data sync
Quality & Testing	Jasmine/Karma, Jest, Ava, SOLID principles, TDD, WCAG 2.1
Tools	Git, Jenkins CI/CD, JIRA, Confluence, Azure (AZ-900), Postman

Languages

English	Professional working proficiency (C1/C2 level)
Tamil	Native
German	Elementary (A1) — actively learning, committed to achieving B1 level

Certifications

- **Microsoft Azure Fundamentals (AZ-900)** — Cloud technologies and deployment models
- **Microsoft Certified: HTML5 & CSS3** — Advanced front-end development with WCAG accessibility expertise
